Xarise
Alexander Kraft
Ahornstraße 71
63071 Offenbach am Main

CATERING

Crew consists of 7 people.
We need 4 vegetarian and 3 vegan meals.
(vegan food only is also fine).

TECH REQUESTS

PA & MONITORING

We usually come with our own FOH engineer Jakob. He brings his own console (A&H dLive C1500), stagebox (A&H dLive CDM32), mics and cables. The only things we need from your side are:

- 1m space at FOH for the console and outboard
- Two CAT (5e or higher) connections between stage and FOH (one for live, one as redundancy)
- 2 stable boom mic stands with SM58 clamps

FOH

The PA feed can be either at FOH (Analog, AES/EBU or Dante 96kHz) or stage (Analog). PA feed through other consoles is only accepted with 96kHz systems and a digital feed (AES/EBU or Dante). Otherwise, please prepare direct analog feeds to the system controller. We always have LR, Sub, Mono Nearfill and Stereo Nearfill feeds prepared in the console. If delays are set in the house console, please provide Jakob with them.

If you have any questions regarding our FOH-Setup, please contact Jakob in advance: info@jha-audio.de / +49 (0) 151 24 09 7447

POWER

All power should be 230 volts with TypeF sockets. Please make sure the backline power is not shared with any lights!

We bring two vertical fog jets which are controlled by the band. For these, we need an extra power connection capable providing at least 2500W.

BACKDROP

We bring a backdrop (4m x 3m)

DRUMSET

If all bands share one backline: well-tuned drumkit (1x Kick, 1x Tom and 1x Floor Tom)

We always bring our own drum-hardware, cymbals, snare, pedals
